

Easy Plug™ Installation System.  
Wiring Simply Plugs Together.

## ILUMA UNDER RAIL LIGHTING KIT INSTRUCTIONS

### Installation Instructions:

1. Install the power supply with the instructions given.
2. Turn the system on by removing the photo eye by unplugging the micro connector from the power supply.
3. Locate where the appropriate length light strips will be mounted.
4. Run the 60" lead down the inside of the sleeve, with the smaller connector out thru the 7/16" hole.
5. Plug the first light strip into the 60" lead.
6. Slide the post sleeve over the post with the larger plug hanging out of the bottom or under the deck.
7. Plug the 60" lead from the post under deck to the connector cable traveling from the power supply by plugging the black connectors together.
8. Clean the rail with the alcohol swabs provided. Remove the backing of the double back tape and adhere the light strip to the rail.
9. Continue to the next railing section by plugging the light strips together and hiding the wire within the post.
10. When finished installing all the lights, reconnect the wire to the photo eye from Step 2.

**No Wire Cutting**
